ST. LUKE'S HOSPITAL TRAINING SCHOOL FOR NURSES.

This school is conducted by St. Luke's Hospital, which was established fifty-one years ago, and is one of the oldest and best known institutions of its kind. Its standing with the medical profession and the general public is and always has been such that comment is unnecessary. While it is an Episcopalian institution, the question of creed never enters into its work, either as to patients or the selection of the pupils in the Training School.

The capacity of the hospital, including the "George Smith Memorial" private patients' building, is a little more than three hundred.

From seven thousand to eight thousand patients are treated per annum. The following classes of patients are treated:

Medical,	Surgical,
Gynaecological,	Obstetrical,
Ophthalmological,	Rhinological,
Otological,	Laryngological,
Oral Surgical,	Orthopedic,
Dermatological,	Neurological,

Pediatric.

Such contagious cases as develop in the Hospital are treated, thereby offering a limited experience in this class of nursing.

The Training School is an integral part of the Hospital and is governed by the same Board of Trustees and officers which direct the Hospital proper. The Directress of the Training School exercises the functions of her office subject to the general authority of the Superintendent of the Hospital. With this reservation, the school is under her supervision and control. Her authority extends over all that pertains to the discipline and duties of the nurses and pupils, both in the Hospital and in the Home, and to their conduct at all times, as well as to their instruction.

The Training School building "Stickney House" was constructed from approved plans for its sole use. It provides individual sleeping rooms for most of the pupils and officers, public reception rooms, sitting rooms reserved for the use of the pupils, a library, lecture and class rooms and a laboratory. Probationers and pupils in the Junior classes are provided for in a separate building "Saranac House." The school buildings are connected with the Hospital by corridors but otherwise are separate and distinct. The school numbers 146 pupils, divided into Preparatory, Junior, Intermediate and Senior classes.

The full term is three years, of which four months is devoted to preparatory work. All pupils must complete the full term, and must devote their whole time to the school, and not allow outside interests to interfere in any way. Any time which may be lost, save in vacations, must be made up at the end of the term. In sickness nurses will be cared for by the Hospital.

Candidates for admission must be between twenty and thirty-one years of age, in good general health, free from physical deformities, and must have a high school education or its equivalent. Women of superior education and refinement will be preferred. Married women are not accepted in the Training School. No exception is made to women who are divorced or separated from their husbands.

Women desiring to make application for admission should fill out the formal application blank in all its details, and send it, together with a letter giving a concise and complete account of the educational advantages which she has enjoyed, and the manner in which her life has been spent, to the Directress of the Training School. A testimonial as to character, etc., from the rector of her church and a certificate from her medical attendant that she is in good health and that she is, in his opinion, physically able to undertake the course; also certificates that she has been vaccinated within one year, and that her teeth are in good condition, are required.

Applicants will be accepted at any time there is a vacancy

and Preparatory classes will be started in February, May and October of each year. The probationary period is one month. At the end of the preparatory course, if accepted, she will be required to sign an agreement to remain in the school the full term, and to conform to all the regulations of the School and Hospital. During the probationary term probationers may, if dissatisfied, leave at any time, and may be rejected at the end of or any time during that period.

No charges are made for tuition. Pupils receive board, lodging and laundry from date of entrance.

During probation they provide their own dresses, but when accepted as pupils nurses are required when on duty to wear the uniform supplied by the Hospital. This uniform material is made solely for St. Luke's, Chicago, and cannot be purchased elsewhere. An excellent reference library is open to the nurses and the text-books are furnished free of charge.

After the pupil has been in this school twelve months she is permitted to have the blue cross (the badge of the school) embroidered on her left sleeves. The St. Luke's Chicago nurses are known as "The Blue Cross Nurses."

When the full term is ended and the final examinations satisfactorily passed the nurse will receive a diploma and a badge.

The course is comprehensive and includes about one hundred and fifty lectures and demonstrations by the members of the Medical Board. Lectures, demonstrations, quizzes and laboratory work in the school laboratory in urinalysis, bacteriology, pathology and chemistry are given by instructors. Class and bed-side instruction and demonstrations are given by the instructors in the different departments. Practical experience is given in the private rooms, wards, diet kitchens, pharmacy and distributing department for hospital supplies and drugs, and sundry other departments of the Hospital.

Pupils receive a thorough course in massage and dietetics, and especial attention is given to the preparation of

food for infants and the general care of children. A kindergarten is conducted in the children's ward.

Pupils are given two hours each day, four hours each Sunday and one afternoon each week for recreation. Three weeks' vacation is given during the Intermediate and Senior years. Pupils will be assigned to the care of private patients in the Hospital, but are never under any circumstances sent to attend patients outside.

Nurses have two telephones in the home Stickney House Cal. 4581, Saranac House Cal. 117, and may call up their friends when they are off duty, they are never permitted to be called to the telephone when on duty. Messages may be left for them at the Training School office.

PROBATIONERS ARE REQUIRED TO BRING WITH THEM:

4 Blue dresses made of required material according to pattern dresses.

10 White Cotton Aprons, of double sheeting, made to come within one inch of the dress edge, to almost meet behind, and gathered to a band $2\frac{1}{4}$ inches deep, buttoned with two small buttons. Hem six inches wide. Also bring three yards extra for bibs and straps if accepted.

1 wrapper which will wash, 1 doz. stiff collars, fastened in front, $\frac{1}{2}$ doz. stiff cuffs (to be worn inside uniform).

2 bags for soiled clothing (wash material plainly marked).

1 napkin ring marked with name in full.

Watch with second hand.

Black shoes with rubber heels.

All clothing must be plainly marked with the full name of the owner.

If the teeth are out of order in any way, they must be attended to first before coming. A certificate from a dentist is required.

Probationers are requested to bring but one small trunk, plainly marked with full name of owner. Also neatly fitted dark cover for trunk.

A certificate of vaccination within one year is required.

Bring cotton dress and apron in hand bag with you.

Either have trunk sent to 1416 Indiana Avenue, or bring check to Hospital. All mail should be directed to St. Luke's Training School, 1416 Indiana Avenue, and packages sent to same address.

LECTURES, DEMONSTRATIONS, QUIZZES AND CLASS WORK OF THE PREPARATORY COURSE.

Preparatory classes will be started in February, June and October of each year. The course will cover a period of four months.

The course will include the following:

THEORETICAL AND PRACTICAL NURSING.

80 classes and demonstrations with model.

Text Book—Pope and Maxwell.

ETHICS OF NURSING.

Text Book—Hampton, Robb. 1 hour weekly for 10 weeks.

ANATOMY AND HISTOLOGY.

Bones.

Muscles.

Kimber's Anatomy. 40 classes.

Notes on Histology.

BACTERIOLOGY.

16 classes.

Text Book—Bolduan & Grund.

MATERIA MEDICA.

Text Book—Baumgarten's.

Inorganic materia medica.

Reading prescriptions.

Application of metric system.

Weights and measures making of solutions.

A portion of all this work is practical, and is done in the School Laboratory. 40 classes.

BANDAGING.

8 lessons and demonstrations.

The rudiments of operating room technique.
The preparation of surgical dressings and supplies of various kinds, with experience in the dressing rooms.

PRELIMINARY DIETETICS.

Text Book—Pattee's Practical Dietetics.

10 lessons with demonstrations.

Practical instruction and experience in the Diet Kitchen.

MISCELLANEOUS.

Practical experience in the Hydrotherapy room.

Practical experience in drug room.

Instructions under Kindergartner in occupation for children.

JUNIOR CLASS.

Anatomy and Physiology.—32 Recitations.

Heart and blood vessels.

The digestive system.

Absorption.

Respiration.

Secretion and excretion.

The urinary organs.

The ductless glands.

The blood.

Essentials of Surgery.—16 Quizzes and Lectures.

Inflammation,

Diseases of bone,

Luxation,

Fractures,

Wounds,

Hernia.

Principle of Nursing.—27 Recitations.

Register's Fever Nursing.

Rubella.

Whooping Cough.

Smallpox.

Acute General Tuberculosis.

Cholera—Tetanus.

Material Medica.—32 Recitations.

Hygiene and Sanitation.—10 Recitations.

Text Book—McIsaac's Hygiene.

INTERMEDIATE CLASS.

Anesthesia.—3 Lectures.

Physiology of Anesthesia.

Accidents in Anesthesia.

Various forms of Anesthesia.

Anesthetic shock or collapse.

Contra indications for Anesthesia.

Methods of resuscitation.

Medicine.—16 Lectures and Classes.

Text Book—Emerson's Essentials of Medicine.

The Mouth and Teeth.—4 Lectures. (Stereopticon.)

Development of the teeth.

Minute and gross anatomy of the teeth.

Order of eruption of the teeth.

Effects of illness in infancy on the quality and shapes of the forming teeth.

Micro-organisms of the mouth.

Causes of decay of the teeth.

Some of the diseases of the mouth, teeth and jaws.

Care of children's teeth.

Care of adult's teeth in health and during an illness.

Effects of some diseases on the mouth and teeth.

Tooth brushes, tooth powder and mouth washes.

Importance of a thorough preparation of the mouth prior to any surgical operation.

Anatomy and Physiology.—10 Recitations.

Gynecology.—8 Lectures.

1. Anatomy of bony pelvis.
Contents of bony pelvis.
Physiology.
2. Traumatism of labor.
3. Pelvic Infections.
4. Displacement of pelvic organs.
5. Tumors, a. benign.
 - a. Fibro—myomata.
 - b. Cysts.
 - c. Polypi.B. Tumors malignant.
 - A. Sarcoma.
 - b. Carcinoma.
6. Tubal pregnancy.
7. Preparation and after care of patients for minor operations.
8. Preparation and after care of patients for abdominal section.

Urinalysis, Bacteriology and Pathology.

6 Lectures and Demonstration.

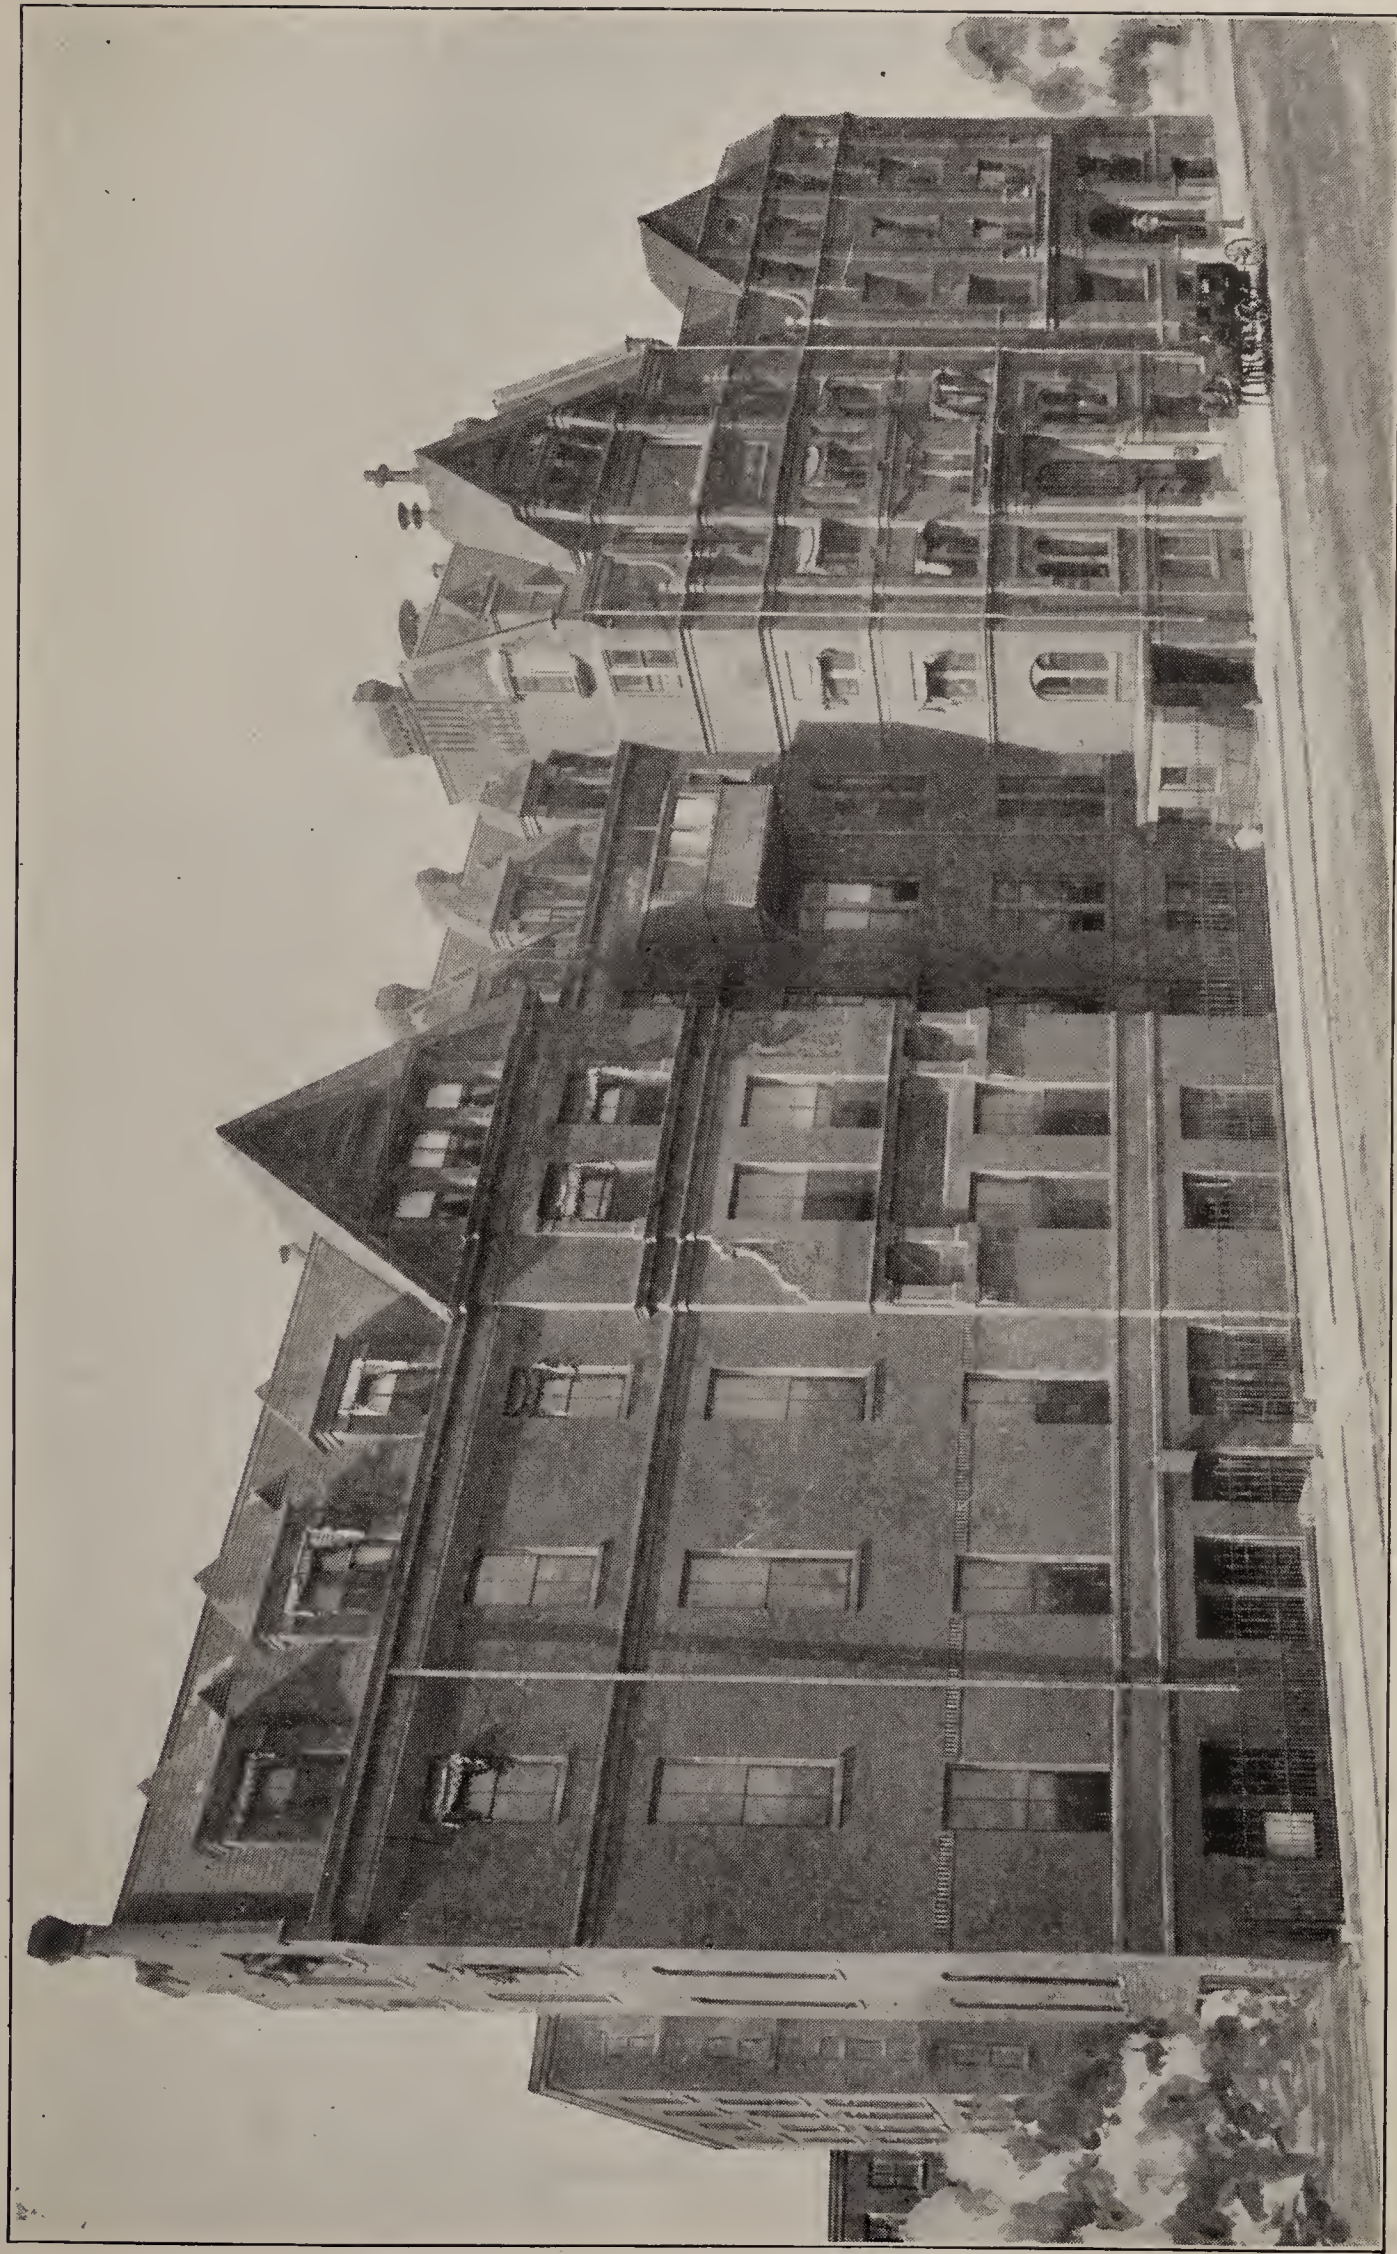

Anatomy of kidney.

Brief consideration of its function and the physiological elimination of waste products.

Normal urine and its constituents; variations within the limits of health.

Abnormal urine, with consideration of the pathologic significance of the constituents and the methods of making examinations for them.

The laboratory work comprehends the rudiments of urinalysis bacteriology and pathology.

INDIANA AVENUE FRONT

Bacteriology.—Pathology.

20 Lectures and Demonstrations.

1. Bacteriology—History and Biology of Bacteria, Classification, Culture Methods and Staining.

A study of the most frequent of the pathogenics, their staining and cultural characteristics, and their activity as a cause of disease.

Avenues of infection by Bacteria—Prophylaxis—the use of germicides and antiseptics, methods of sterilization serum therapy and vaccines.

2. Pathology: Demonstrations of gross specimens of tumors and their classification into benign and malignant.

The lecture work is supplemented also by stereopticon slides illustrating disease process in different organs and comparing the normal histology with the pathological.

3. Blood Examinations:

Demonstrations of both fresh and stained specimens by the microscope—the different forms of leucocytes and their significance in disease—use and technique of the Widal test.

Obstetrics.—15 Recitations.

Text Book—DeLee's Obstetrics.

Orthopedics—Lectures and Clinics. 7.

Tuberculosis of bones and joints.

Tubercular hip and spine.

Scoliosis, Etiology and treatment.

Obstetrics.—6 Lectures.

Physiology of pregnancy.

Hygiene.

Duties of nurse prior to, during and after a case of normal labor.

Three stages of labor.

Care of infant during first month.

Variations of abnormal labor and pregnancy, including—

Extra uterine pregnancy, Convulsions,

Post-partum hemorrhage, Pulmonary embolus,

Placenta previa, Rupture of uterus.

Clinics:

External and Internal Examination.

Didactic Lecture Course in General Chemistry.—20 Lectures and Quizzes.

Text Book—

Including physical and chemical forms with a detailed discussion of the elements common to medical practice.

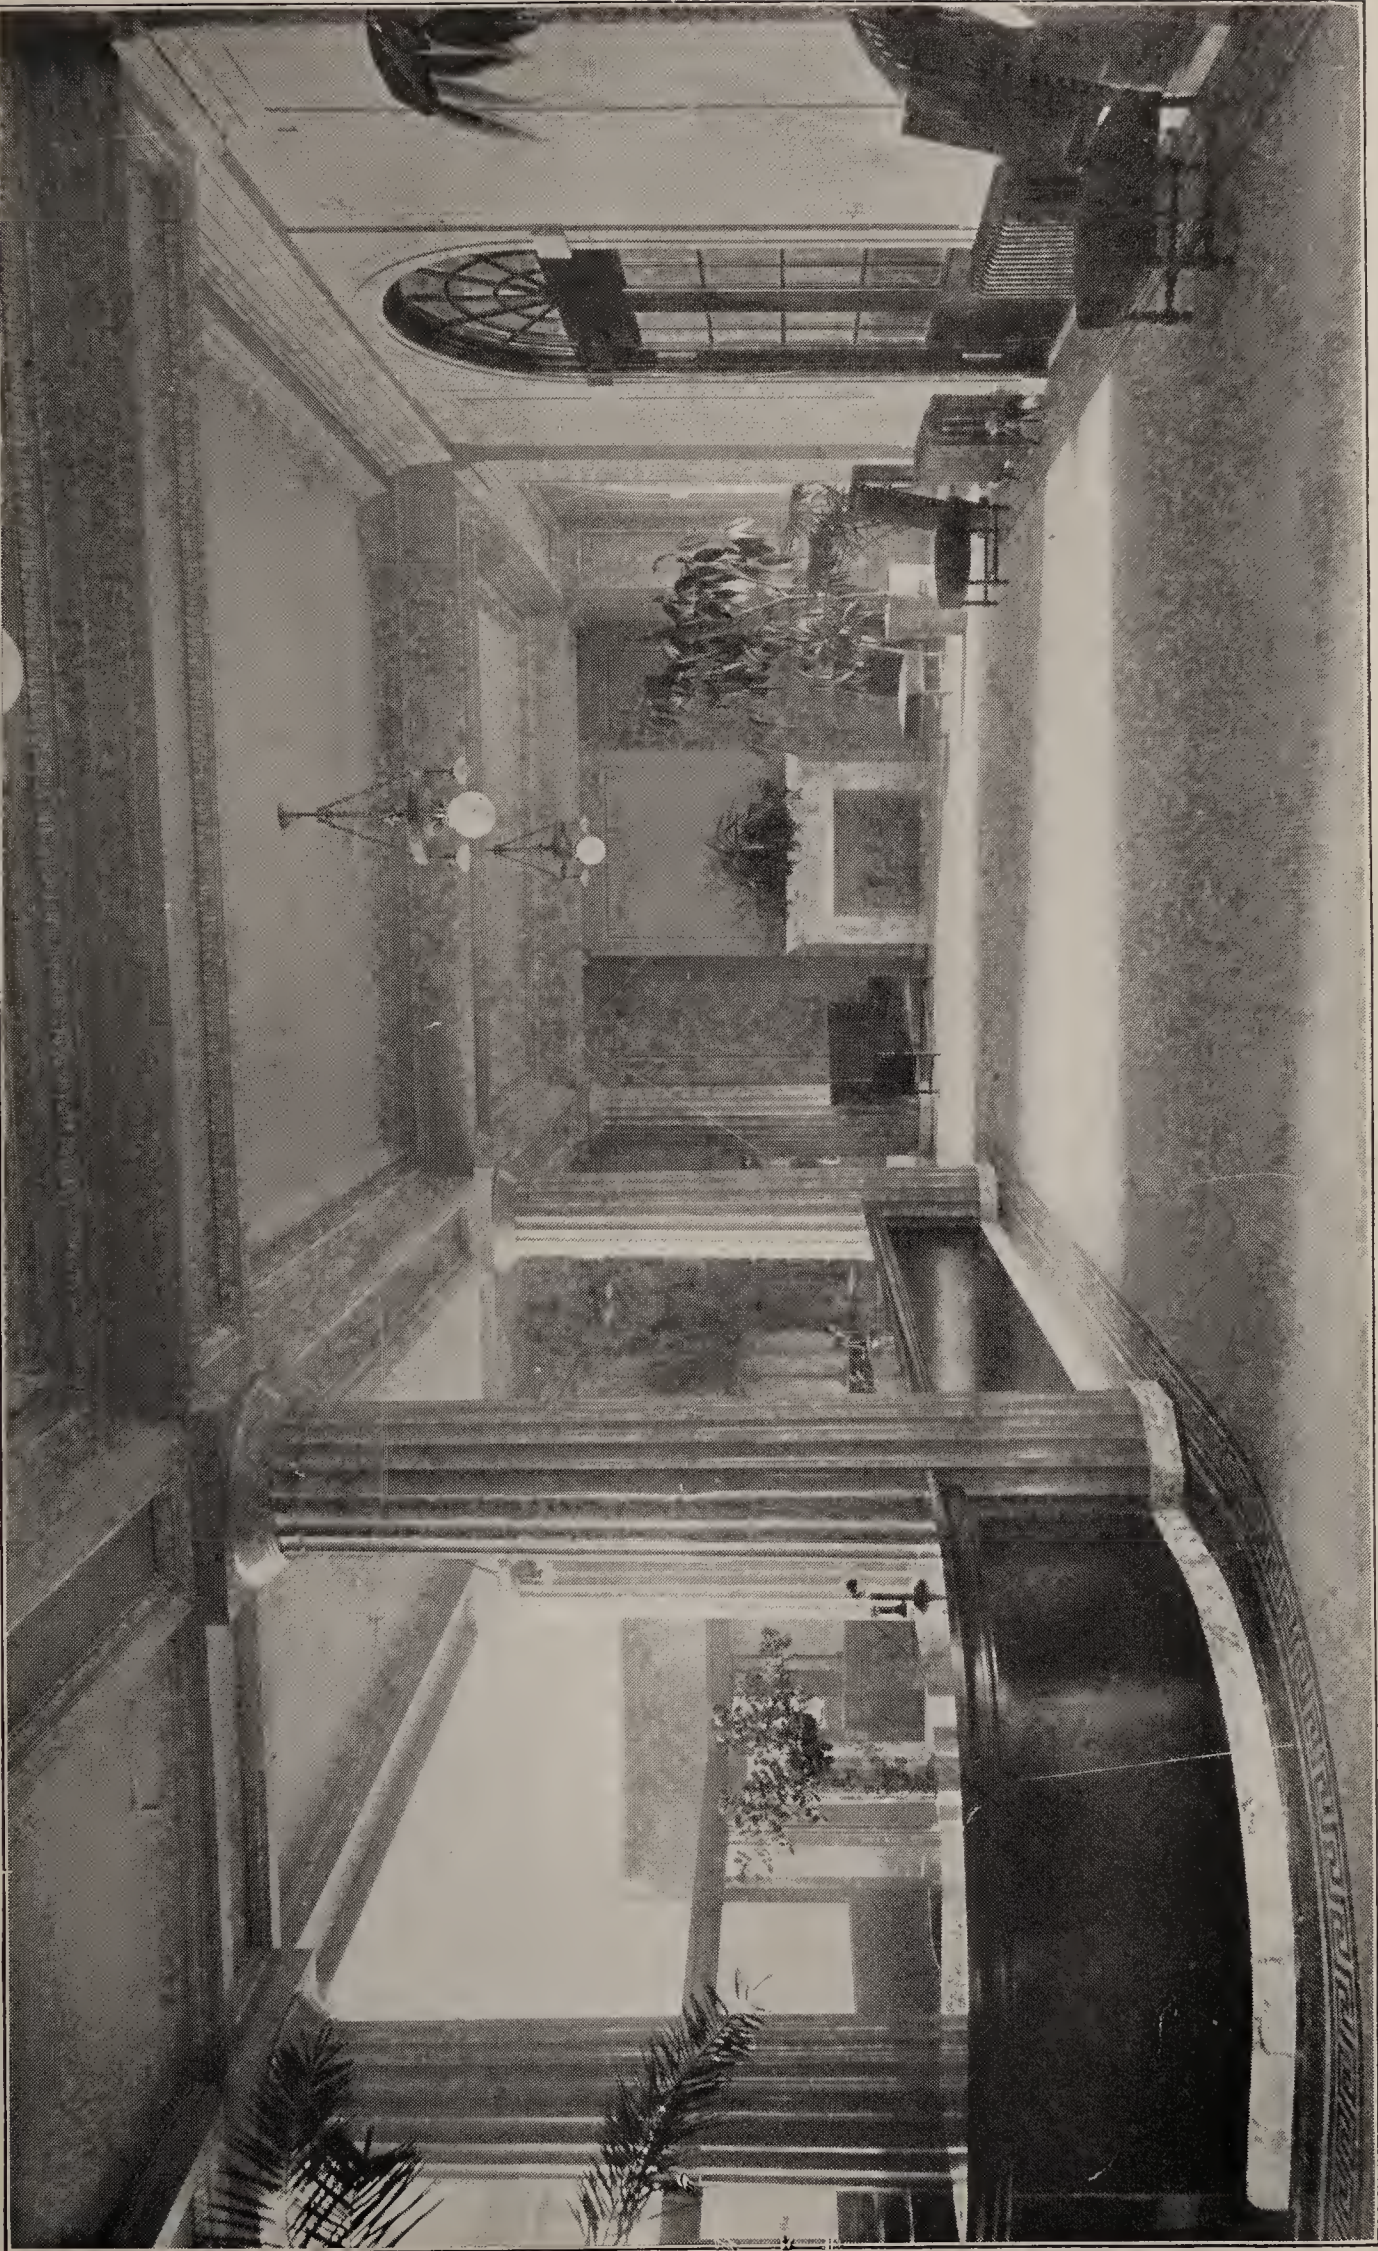

Eye—Lectures.

Synopsis.

The eye as an organ of vision and the ordinary care of our own eyes. The distinguishing peculiarities of structure of the eye and its appendages. Preparation of the patient and eye instruments for operation. Preparation of solutions, dressing material, etc., in eye work. Description of the cataract operation as illustrating the necessity for especial care in the nursing of eye patients. Iritis, illustrating use of hot fomentations. Purulent conjunctivities, illustrating use of iced compresses and irrigation.

Care of Diseases of Children—10 Lectures, with Infant Feeding.

1. Infant Mortality, Causes and Remedies.
2. The Physical and Mental Development of the Baby.
3. Hygiene of the Baby.

5. Diseases of the New-born.
6. Gonorrhea and Syphilis in Infancy and Childhood.

MAIN OFFICE

7. Infant Feeding, Breast Feeding, Mixed Feeding.
8. Artificial Feeding of the Healthy Baby.
9. Artificial Feeding of the Sick Baby, and Food.
10. Rickets and Scurvy.

Medicine.—8 Lectures.

Typhoid Fever.

Diabetes.

Pneumonia.

Nephritis.

Gall Bladder Infections.

Tuberculosis.

Feeding of Medical and Convalescent Patients.—6 Lectures.

Food and its relation to the body.

Estimates of food values.

Digestion.

Value of different methods of feeding.

Massage.—10 Lessons.

In Classes of 10.

Surgery.—4 Lectures.

The handling and care of fractures.

Complications following laparotomy, appendicitis, cholecystitis.

Disease of Eye.—2 Lectures.

1. Anatomy of the eye.
2. Care in health and disease.
Care after operations.

Throat, Nose and Ear.—4 Lectures.

1. The nose.
2. Naso-Pharynx, including tonsils and adenoids.
3. The Larynx.
4. The Ear.

Diseases of the Skin.—3 Lectures.

1. The care of the skin. Anatomy and physiology of the skin.
